

Feedlot Special

Introducing the All New ***Feedlot Special***

52 Series Feedlot Special

The 52 Series Feedlot Special four auger mixer is designed to handle all types of rations that are being fed today. It will mix a high inclusion rate of wet distillers grains but also mixes with the gentleness that a steam flaked ration requires. The 52 Series handles the mixing and feeding of these rations with ease. The innovative drive system provides smooth, efficient operation and runs much quieter than other mixers.

- Simple and rugged design
- High torque hydraulic drive system
- Heavy duty mixing augers and feeding system
- Variable speed drive for precise mixing speed and feed out control without having to increase engine RPM's
- Gravity flow discharge eliminates maintenance issues of traditional conveyor or auger style discharges found on competitive four auger mixers
- Mix on the go, feed in one pass
- Single joystick control for gate, chute, mixing and feeding functions
- Save labor, fuel, and downtime
- Extended warranty

MMI International is owned by cattlemen who have many years of experience in the feedlot business. The 52 Series Feedlot Special incorporates all the function and reliability cattlemen and dairymen have asked for. After years of research and development, MMI International has built the perfect mixer for all rations. If you are looking for a way to increase your efficiency and control the costs of feed delivery with superior performance and reliability, then the MMI 52 Series Feedlot Special is what you're looking for.

52 Series MODEL 6052 Specifications	
Capacity	600 Cubic Ft.
Dimensions:	
Inside Width	94"
Inside Length	192"
Inside Height	77"
Outside Width	101"
Outside Length	225"
Outside Height	78"
Door Opening	48 x 26"
Height on Truck	124"
Height on Trailer	115"
Standard Weight	15700

Better Mixing - Better Feeding - Built to Last - Less Down Time

Feedlot Special

Front Mounted Gravity Feed Discharge -

48" side mounted gate with gravity discharge chute

Innovative Auger Design - Patent Pending

Fast efficient mix times while maintaining consistent ration mix with less HP. Mix on the fly. One pass feeding.

Fewer Components -

Less moving parts
Less maintenance
Less down time
Extended Warranty

Heavy Construction -

5/8" flighting at discharge, 2 15/16" top and 3 15/16" bottom stub shafts, 1/4" top and end panels, 1/4" bottom troughs

Hydrostatic Drive -

High Torque Hydraulic Drive System
Single Joystick Control

52 Series Feedlot Special -

Available in 3 Models:
Model 6052: 600 Cubic Ft. Capacity
Model 8052: 800 Cubic Ft. Capacity
Model 1052: 1000 Cubic Ft. Capacity
